

W I S C O N S I N
RENEWABLE
ENERGY SUMMIT

MARCH 12 – 14, 2008

Chris Jurik

SPEAKER BIOGRAPHY

Chris Jurik

I have Bachelor of Science Degree in Industrial Technology with concentration in Plant Engineering. My past working experience with a consulting firm (Anco) to review and collect data for energy savings projects in a demand side management program for a Local Utility Company provided a common sense approach to reducing demand of electricity at other past employers for the past 22 years in Facilities Engineering. My current employer (GE Healthcare) has given me the opportunity to pursue and implement renewable energy projects to reduce our dependence on fossil fuels to become a environmentally sustainable company. Our company has continued to educate and share our experience to improve our environment for our employees and community.
